THE MISSNER GROUP COMPLETES ADVANCED LIFE SCIENCES LABORATORY EXPANSION

(Skokie, Illinois) – The Missner Group is pleased to announce that the firm has completed an office and laboratory expansion for Advanced Life Sciences (ADLS-NASDAQ) in Woodridge, Illinois.

Located at 1440 Davey Road, Advanced Life Sciences is a biopharmaceutical company focused on the discovery, development and commercialization of novel drugs in the areas of infectious disease, inflammation and oncology. The Missner Group constructed Advanced Life Sciences' Woodridge facility in 2004, a 44,000 square foot research and office building within International Centre. The recent expansion includes an additional 2,000 square feet of office and conference space, and 1,500 square feet of laboratory space. The laboratory extension doubled the existing area and is designed for pharmaceutical research and development. The offices feature exposed ceilings, spiral ductwork and high-bay lighting for a modern, high-tech appearance.

The Missner Group's Glen Missner was the project executive and Jess Knigge was the senior project manager for the project. Harris Architects provided architectural services. This latest expansion represents the fourth project completed for Advanced Life Sciences by The Missner Group.

The Missner Group, headquartered in Skokie, Illinois, provides comprehensive and integrated real estate development and construction services throughout the Chicagoland and Midwestern markets. The firm, established in 1945, has completed more than \$800 million in construction projects, and has orchestrated the development of more than four million square feet of commercial and industrial real estate.
